## Boil Water Advisory in Midland Lifted Effective Immediately

**Attention:** Physicians, Hospitals, CNE, ER Manager, ER Physician, Infection Control Practitioners, Occupational Health Professionals, Community Health Centres, Walk-In Urgent Care Clinic, Nurse Practitioner, Ontario Health, Ontario Health Teams, Midwives, Family Health Team, Indigenous Healthcare & Community, Long-Term Care Homes, Retirement Homes, Paramedic Services, Corrections

**Date:** August 27, 2024

---

The Boil Water Advisory issued for the Town of Midland's East Pressure Zone on August 26, 2024, has been lifted by the Simcoe Muskoka District Health Unit (SMDHU) effective immediately. Laboratory test results have confirmed that the water is free from contamination and is safe to drink.

As a precaution, residents and businesses in the affected area should take the following steps before using their water:

- Run all cold faucets for a minimum of five minutes. If the water does not run clear after five minutes, visit the Town of Midland's [website](#) for more information.
- Run drinking water fountains for a minimum of five minutes.
- Run all water softeners through a regeneration cycle.
- Replace pre-filters and follow the manufacturer's instructions for reverse osmosis units.
- Replace water filters, as they are disposable and may be contaminated. This applies especially to carbon filters and others that are near the end of their life.
- Drain and refill hot water heaters set below 45°C (113°F). Normal setting is 60°C (140°F).
- Drain and flush all ice-making machines and soda fountain machines.
- Flush, clean and sanitize appliances with water line connections (e.g., fridges with water and ice dispensers), following the manufacturer's instructions.
- Dispose of any ice made since August 26, 2024.
- Large-volume users (for example, institutional settings) may need to run cold water taps for a longer period of time on first use to ensure the water is not cloudy.

**Note:** please consult the manufacturer or owner's manual for detailed instructions on how to flush and disinfect ice or soda fountain machines and how to restart water treatment devices.

Any facilities that were closed because of the advisory can now reopen after taking the necessary precautions as listed above.

Dental offices are to follow the Royal College of Dental Surgeons of Ontario, Infection Prevention and Control Guidelines for waterline maintenance after water interruptions under [boil water advisories](#) (page 31).

For more information, visit [smdhu.org/BoilWater](http://smdhu.org/BoilWater) or call Health Connection Monday to Friday, 8:30am-4:30pm at 705-721-7520 or 1-877-721-7520, ext. 8811 to speak with a public health inspector.
